

ST 16

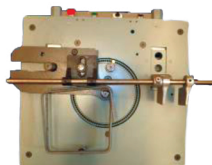

Leadermec St16 Stirrup bending machines are designed with maximum attention to detail in order to guarantee High-speed production of stirrups in different sizes. Our machines, which are all equipped with a manual electrical panel, can be either single phase or Three-phase.

This is a compact machine that comes with four removable legs, allowing fast and easy transportation. User will find it particularly easy to operate, thanks to handy tool tray, fitted on every piece.
